Our secret recipe

Ready-made salad dressings that taste home-made? Yes, it's possible! The secret behind our huusgmacht ORGANIC dressings is simple: they are created using sophisticated recipes developed by company founder Roman Donzé, are left unpasteurised for fuller flavour, and are carefully prepared by hand. That's why our dressings taste so authentically home-made.

Authentic – free from additives

Our classic salad dressings develop their flavours naturally – without flavour enhancers, sulphites or artificial additives. They have an outstanding shelf life of at least five months and are vegetarian or vegan. Guaranteed to be natural and authentic – not to mention uniquely delicious.

Amazing salads ready in no time

Our recipe for happiness: keep a bottle of huusgmacht ORGANIC salad dressing on hand at all times. In the mood for salad, but little time to make one? Just grab our dressing out of the fridge for a delicious meal that will be ready in no time at all. Our classic Swiss dressings are a quick way to jazz up your salad creations at home or on the go.

Sustainable, ORGANIC, cruelty-free

We obtain all of our ingredients from certified ORGANIC suppliers who emphasise sustainable, environmentally friendly production methods and animal-friendly farming practices. We obtain our ingredients from local Swiss ORGANIC suppliers wherever possible.

It is perfect as a salad dressing, dipping sauce for vegetables, a marinade for tofu, or even a spice for soups. The possibilities are as colourful and diverse as Indian fashion. Namaste!

Your healthy meal will be ready in a heartbeat, and our dressing will add a touch of flavour that tastes decidedly home-made. Oh là là, c'est magnifique: organic herbs lend this dressing its tangy, straight-from-the-Provence flavour, while fine mustard adds a cheeky dash of spice. Et voilà – with huusgmacht ORGANIC French dressing, dinner is practically already served.

ORGANIC – in harmony with nature

Our huusgmacht ORGANIC dressing line is a reflection of our conscious commitment to treating the environment with care.

This is a commitment that influences every step of the supply chain. The organic yoghurt for our dressing, for instance, requires animal-friendly farming practices and dairy cows with lots of access to open pastures. But it doesn't end there: the feed for the cows must meet organic farming guidelines, meaning that naturally occurring manure is used instead of artificial fertilisers. Instead of synthetic chemical pesticides, beneficial species such as ladybirds are used to protect plants from pests.

With this holistic approach, we are able to create high-quality products that respect and safeguard natural resources.
